Latitude - 42.440439 (42:26:25.580 N)

Longitude - -079.332150 (79:19:55.740 W)

Time Zone – Eastern

MANAGEMENT

Production Room:

2nd Floor of building – Room 204 (access through house balcony)
Phones available. Internet access. Fax and Copy machine.

Green Room:

10' x 12' (3.05m x 3.66m) adjacent to dressing rooms and below stage.

Stage Manager's Console:

Located offstage left, in the downstage corner. Clear-com headset with stage audio monitor.
Video monitor available upon request.

Crews:

Paid students or area professionals brought in at T.D.'s discretion after review of tech riders.
No Union crew available.

Policies:

House opens ½ hour prior to curtain. Normal show time is 8:00 pm (7:00 pm for children's shows). Alcohol is not allowed in the theatre. Building is a smoke-free environment.

LOAD-IN AREA

Dimensions:

Loading dock to the opera house is located on the east side of the building. Trucks may back up to unload at the lower cement loading dock (3'10" or 1.17m high) where a 10'6" (3.20m) section of railing may be removed for loading and unloading. Everything must then be carried up to the 8'6" (2.59m) high level where the doors to the stage are located. Doors are 4' x 8' (1.22m x 2.44m) allowing for a full 8' x 8' (2.44m x 2.44m) entrance to the stage. Please see Attachment 1.

CARPENTRY

Seating:

444 – 260 main floor, 184 balcony. Wheel-chair access to main floor. See Attachment 2.

Stage Dimensions:

Proscenium – 28' wide x 23' high (8.84m x 7.01m). Stage is approx. 24' deep (7.32m). Apron below plaster line is arched and 6' (1.83m) at center.

Wing Space – 11' (3.35m) on either side. Offstage left in back is storage for the man-lift and sound equipment. Offstage right in back is storage for the movie speaker and the baby grand piano. None of this is intrusive on stage space, nor will it leave the stage.

Grid Height – The opera house does not have a grid per se as everything is dead hung from the ceiling support beams. Height from stage floor to these beams is approx. 30' (9.14m).

Orchestra Pit – 24' x 5'6" (7.32m x 1.68m) set 13" (.33m) deep into the house floor. The pit is non-moveable.

Stage Height – 4' (1.22m) above house floor.

See Attachment 1 for full stage layout.

Stage Floor:

Tempered masonite painted charcoal brown in good condition. No traps available. Stage screws, drywall screws, and nails allowed. Any fastening to the stage must be through the Technical Director.

House Draperies:

House Curtain – Burgundy w/ Gold Trim on a traveler system at plaster line. Operation line located offstage left by Stage Manager's Console.

Legs – 4 pair, black velour, 8' wide x 20' long (2.44m x 6.10m), no fullness.

Borders – 4, black velour, 42' wide x 8' long (12.80m x 2.44m), no fullness.

Full Stage – 2, black velour on traveler tracks, full stage meeting in middle.

Scrim – No scrim available.
Cyclorama – No cyc available.

Line Set Data:

Line Plot – See Attachment 3

Working Height of Battens – All free battens are at 22' (6.71m).

Battens – 23 (10 free), 36' long (10.97m), 2" schedule 40 pipe.

Type – Dead hung.

Arbor Capacity – 500 lbs. per pipe (226.80kg).

Support Areas:

Crossover – Behind upstage traveler. 3' wide (.91m). From backstage to back of house must be made outside building.

Storage – Limited storage room available.

Access to Stage – From house left and right through box doorways. From dressing rooms and green room, up spiral staircases to stage left or right.

Notes – Call the Technical Director w/ any questions or concerns – (716) 679-0891.

LIGHTING

Power:

120 / 208V; 3 phase, 800 amp. 20 amp 3-pin stage connectors.

Dimmers:

1-96 20 amp 2.4 kW dimmer per circuit, no spares or replacements available.

Control Board:

Strand Lighting MX, 48 channel. Located in control booth at rear of house through office.
